1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claim 1-27, 42-46, are drawn to a memory device, classified in class 257, subclass 261.
  - II. Claim 53-83, drawn to printing device, classified in class 347, subclass 112.

The inventions are distinct, each from the other because of the following reasons:

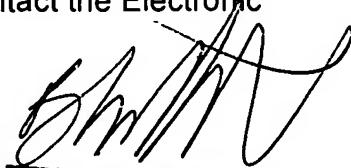

2. Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and II as disclosed have different functions. Invention I as disclosed is used as a memory device and Invention II as disclosed is used as a printing device.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
